

BULK PLANE STANDARDS

ZONING CODE REGULATIONS

The following information applies to all new *single-unit homes, additions, and accessory structures* in all residential (R-series) zone districts. This information is a summary of [Section 26-642](#) of the City Code.

Measuring the Bulk Plane

Allowable Encroachments

The following encroachments into the bulk plane are allowed:

- Chimneys
- Open-type railings compliant with the adopted city code.
- Architectural features (no more than 30 inches into bulk plane)
 - Cornices, eaves, beltcourses, sills, canopies or other similar architectural features including bay windows.
- Mechanical equipment
 - Vent pipes, solar panels, swamp coolers
- Dormers
 - May be no larger than 8 feet wide and 6 feet tall, as measured from the lowest point of intersection between the roof and the dormer.
 - May occupy no more than 50% of the roof.
